

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Original) A rotogravure coated paper comprising a coating layer containing a pigment and an adhesive on a base paper, wherein the coating layer contains an inorganic pigment having a volume-based distribution in which 65% or more of particles are in the particle diameter range of 0.4-4.2 μm and a hollow sphere synthetic pigment having a mean particle diameter of 0.1-0.6 μm .

2. (Currently Amended) The rotogravure coated paper of claim 1 ~~characterized in that~~wherein the hollow sphere synthetic pigment is ~~contained~~present in an amount of 2-30 parts by weight per 100 parts by weight of the inorganic pigment.

3. (Currently Amended) The rotogravure coated paper of claim 1 ~~characterized in that~~wherein 3-12% by weight of an amorphous silicate ~~is contained on the basis of~~based on the weight of the base paper is present.

4. (Currently Amended) The rotogravure coated paper of claim 1 ~~characterized in that~~wherein 75 parts by weight or more of kaolin is included as an inorganic pigment component ~~in~~per 100 parts by weight of the inorganic pigment.

5. (Previously Presented) A process for preparing the rotogravure coated paper of claim 1.
